DETAILED ACTION

REJECTIONS WITHDRAWN

1. The 35 USC 112 1st paragraph rejection set forth in the non-final rejection of 5/11/05, pages 3, paragraphs 7-8 are withdrawn.

REJECTIONS REPEATED

2. All of the 103(a) rejections set forth in the non-final rejection of 5/11/05, pages 3-4, paragraphs 9-10 are repeated for the reasons of record.

NEW REJECTIONS

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sundet (US 5665446) in view of Futhey (US 5840407).

Claims 7-10 are rejected for the same reasons as claims 1-6 in the non-final rejection of 5/11/05, pages 3-4, paragraphs 9-10. Claims 7-9 recite the same limitations, albeit with different dependencies, as claims 2-4. Claim 10 recites that projecting portions are disposed at right angles. However, Futhey discloses beveled films. It would have been obvious to one of ordinary skill in the art to have provided

Art Unit: 1772

right angles in order to provide a more aesthetically pleasing appearance since it has been held that finding the optimum workable range or variable is obvious and well within the level of one of ordinary skill in the art (MPEP 2144) (applies to instant claim 10).

ANSWERS TO APPLICANT'S ARGUMENTS

5. Applicant's arguments filed 8/11/05 have been carefully considered but are deemed unpersuasive.

Applicant has argued that the claimed lengths of decorative film tape were well known prior to the present invention and that such lengths of tape have been used to decorate glass substrates, however, there has been no laminate of the type claimed that includes such lengths formed and applied by a computer operated tape applicator. However, the method by which an article is made is not germane to the patentability of the article in a product claim (MPEP 2113).

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1772

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
